

NEW ONLINE COURSE FROM SAMHSA'S CAPT

Opioid Overdose Prevention: Understanding the Basics

In 2017, the problem of opioid overdose was declared a public health emergency in the United States. This new online course from SAMHSA's Center for the Application of Prevention Technologies is designed to help prevention practitioners understand and address this urgent problem. Through engaging activities, reflections, and videotaped interviews with prevention leaders, this course introduces the range of factors associated with opioid overdose and promising strategies to address it.

Dates

Monday, May 7 – Friday, May 18, 2018

What does participation entail?

You may take the course at any point during the dates listed above. The course will take approximately five hours to complete, though timing will vary depending on your learning style and familiarity with the content.

We need your feedback!

We are piloting this new online course with a small group of SAMHSA Grantees, so we would really like to know what you think of it! We encourage you to complete the feedback survey at the end of the course and invite you to share any thoughts, questions, or comments with us by emailing aestrada@edc.org.

Accreditation

This course has been endorsed by the International Certification and Reciprocity Consortium (IC&RC). Individuals who receive a passing grade on the course self-assessment (80% correct) will receive a Certificate of Completion for five hours of participation.

Registration

Please register by May 3, 2018 at: <https://www.surveymonkey.com/r/register-overdose-050718-PA-pilot>
We will provide you with access information 2-3 days prior to the course start date.

Questions?

If you experience technical issues, please contact Anina Estrada (aestrada@edc.org). For all other questions, please contact Ivy Jones Turner (ijonesturner@edc.org).
